TSC Category	In-Flight Catering					
TSC	Cabin Loading Activities					
TSC Description	Implement cabin loading procedures to facilitate safe and efficient loading and storage of food, beverages and in-flight meals on aircraft					
TSC Proficiency Description	**Level 1**	**Level 2**	**Level 3**	**Level 4**	**Level 5**	**Level 6**
	ATP-IFC-1001-1.1	ATP-IFC-2001-1.1	ATP-IFC-3001-1.1			
	Prepare and load in-flight meals according to established cabin loading plans	Monitor the loading of in-flight meals to ensure adherence to cabin plans	Improve manpower deployment and loading procedures of catering trucks to enhance efficiency of cabin loading activities			
Knowledge	• Concept of cabin plans in in-flight catering operations • Terminologies used in aircraft cabin plans • Aircraft cabin layouts • Logistics involved in transporting food, beverages and in-flight meals from central kitchens to aircraft • Cart-loading procedures	• Meal menus and plans on flights • Food production scheduling procedures • Equipment planning and allocation • Terminologies used in aircraft cabin plans • Aircraft cabin layouts • Logistics involved in transporting food, beverages and in-flight meals from central kitchens to aircraft	• Aircraft cabin layouts • Consumption and waste patterns of in-flight food, beverages and meals • Catering truck capacity and dispatch procedures • Logistics involved in transporting food, beverages and in-flight meals from central kitchens to aircraft • Cabin weight allocation and distribution • Flight schedules • Cost-benefit analysis			
Abilities	• Interpret cabin loading plan designs and stock cabins • Dock catering trucks to aircraft for loading activities • Execute procedures to load carts and catering equipment onto the aircraft in accordance with cabin loading plans	• Coordinate the loading of carts and catering equipment onto the aircraft according to cabin loading plans • Check and monitor procedures to ensure adherence to cabin loading plans • Inform staff and other relevant stakeholders of changes to cabin loading plans as mandated by the airlines	• Assess loading requirements of aircraft and recommend solutions to enhance deployment of catering trucks • Verify flight schedules to ensure efficient allocation of manpower resources to execute aircraft loading activities • Recommend changes to cabin loading plans to reduce costs for airlines
