

SFw for PE (Version 2) Career Pathways

The Career Map serves as a reference to reflect the available job roles and possible career pathways in the Food Manufacturing Sector, which may vary depending on company's structure and business context. The career progression pathways would depend on individual aspiration, performance, capability, experience and company needs.

Skills Framework for Precision Engineering Career Tracks

Technical and Engineering

The Technical and Engineering function is primarily responsible for the design and maintenance of equipment and systems used in the manufacturing of products and components. It utilises scientific expertise to design new products and leverage on new technologies to continuously improve the efficiency of mass production processes.

Management

The Management function oversees production operations, resource planning and manages production schedules. It combines intimate knowledge of manufacturing processes and business strategy to ensure continued business competitiveness and commercial success.
