

VIBRANCE OF THE Care Economy

The Care Economy is a vibrant field that is continuously innovating ways to care for, support and empower citizens to reach their full potential. Singapore's diverse and ageing population demographics pose an ongoing demand growth for care services.

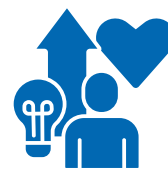

Care facts:

One in four citizens expected to reach **65** and above by **2030**, need to promote preventive and proactive health measures.

Health technology is a key enabler to expand care services through virtual consultation, ward management and coordinated care provision.

As Care Economy transforms, care professionals will embrace new work practices, augment their work with technologies, and maintain their learning agility.

Addressing the growing demand for caregiving services and support for both individuals and society:

Demand for care services spurs need for holistic skills and innovative models

High demand for collaborative skills

required for medical social workers and psychologists

Demand for skills in volunteer retention, engagement and mentoring

to support volunteerism as key resource

Importance of business innovation

which requires the knowledge of technology use and staff ideation involvement

Employers continue to demand skills that enhance service experience and service delivery value chains

Continuous Improvement Management

essential to enhance service quality

Ethical and Professional Integrity

builds trust, upholds moral principles, maintains confidentiality

Excellence in Service

ensures responsive services to individuals and families

Care skills demand rises as professionals need them for collective care outcomes

Practice Supervision

provides structured and supportive process

Professional Consultation

enables medical and social service professionals to work together to address clients' needs

Mental Health and Well-being Support

to promote good mental health practices at the workplace
