

NAVIGATING CAREER TRANSITIONS TO Roles In Demand

Career transitioning opens doors for movement into growth economies and in-demand job roles. Employers also play a key role in recognising the skills individual workers bring to their organisations, creating opportunities for career mobility internally.

Some roles are more suited for career transitioners as:

They offer more entry-level positions.

The required proficiency levels of technical skills in these job roles are more attainable.

The job offers career progression opportunities, entry to expert roles and potential diversification to adjacent roles.

Individuals with a clear career direction can choose targeted pathways, such as Career Conversion Programmes (CCP) and SkillsFuture Career Transition Programmes (SCTP), with facilitated job placement opportunities. Meanwhile, those exploring multiple career options can pursue alternative pathways like stackable full qualifications to keep their options open.

Prominent roles in Green, Care and Digital Economies and programmes that can facilitate job transitions into these roles:

Enrolled Nurse	Courseware Developer	Data Analyst	Security Engineer	Process Engineer	Business Development Manager
